1. List 3 different protocols that appear in the protocol column in the unfiltered packet-listing window in step 7 above.

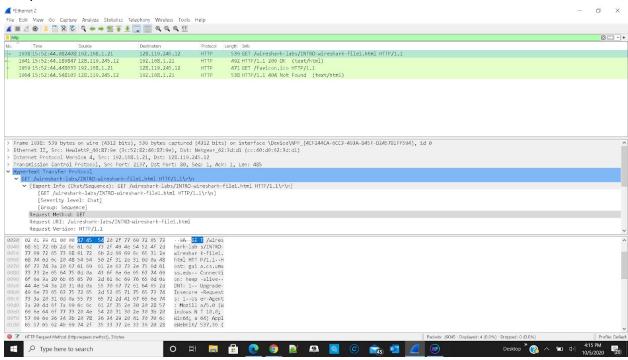

There were many different types of packet listings I saw. To name three of the protocols from the unfiltered packet-listing, I saw TCP, HTTP, and QUIC.

2. How long did it take from when the HTTP GET message was sent until the HTTP OK reply was received? (By default, the value of the Time column in the packet-listing window is the amount of time, in seconds, since Wireshark tracing began. To display the Time field in time-of-day format, select the Wireshark View pull down menu, then select Time Display Format, then select Time-of-day.)

The time of the GET message was 15:52:44.082408. The time of the OK message was 15:52:44.189847.

3. What is the Internet address of the gaia.cs.umass.edu (also known as wwwnet.cs.umass.edu)? What is the Internet address of your computer?

The internet address of the gaia.cs.umass.edu was 128.119.245.12. The internet address of my computer is 192.168.1.21.

4. Print the two HTTP messages (GET and OK) referred to in question 2 above. To do so, select Print from the Wireshark File command menu, and select the "Selected Packet Only" and "Print as displayed" radial buttons, and then click OK
